Product highlights

Comfortable ear cushions
The special shape and luxurious materials used for the ear cushions ensure a perfect fit for maximum comfort. They prevent audio leakage and enhance bass performance too. The ear cushions are shaped in such a way that they perfectly align with the area around a person's ear.

Neodymium magnet
Neodymium is the best material for producing a strong magnetic field for greater sensitivity in a voice coil, better bass response and higher overall sound quality.

1.2 metre cable
The ideal cable length to give you the freedom to put your audio device where you want.

24 k Gold-plated plug
You can rest assured that the precious metal gold finishing on the plug will give you a more reliable connection for better quality audio.

Bass Beat vents
Bass beat vents allow air movement for better sound with a deep, rich bass.

Flexible rubber ear hooks
The rubber ear hooks provide a non-slip grip for an extra secure and comfortable fit, ensuring that the headphones remain in place for hours of comfort. Ideal for active use.

Large speaker drivers
Large speaker drivers have more capacity to create sound. They therefore offer a powerful, rich sound experience.

Single-sided cable
The cable is conveniently connected to just one side, considerably reducing the risk of tangling and simplifying winding the cable up for storage.

Strain relief
A soft, flexible sleeve protects the cable connection from damage that would otherwise occur from repeated bending, extending the product life.

3-way adjustment
The 3-way adjustability includes a fully flexible hinge enabling 360-degree movement and a 3-position rubber ear hook. This enables you to position the neckband perfectly on your ears for hours of secure comfort.
